

Seminars

The Netherlands Cancer Institute - Antoni van Leeuwenhoek Hospital - Winter/Spring 2012 Program

Speaker	Town	Title	Host	Day	Month	Time	Location
Alfred Goldberg	Boston	New insights into proteasome function: From protein degradation to cancer therapy	Huib Ovaa	Thursday	Jan 12	15.00 hrs	Auditorium
Matthijs Verhage	Amsterdam	The protein machines that regulate organelle docking & fusion and cargo delivery at the surface	Peter Peters	Friday	Jan 13	11.00 hrs	Auditorium
Johannes Walter	Boston	The mechanism and regulation of DNA replication: from cell-free systems to single molecules	Linda Clijsters	Friday	Jan 20	11.00 hrs	Auditorium
Marcus Groettrup	Konstanz	How, where, and why the ubiquitin-like modifier FAT10 targets substrates for degradation by the proteasome	Huib Ovaa	Friday	Jan 27	11.00 hrs	Auditorium
Clemens Schmitt	Berlin	Senescence and senescence-related vulnerabilities in cancer therapy	Christian Blank	Friday	Feb 3	11.00 hrs	Auditorium
Daniel Durocher	Toronto	Chromatin ubiquitylation and the response to DNA double-strand breaks	Jacqueline Jacobs	Friday	Feb 17	11.00 hrs	Auditorium
Lodewyk Wessels	Amsterdam	Molecular networks in cancer	-	Friday	Mar 2	11.00 hrs	Auditorium
James Bradner	Boston	Chemical inhibition of bromodomains	Jan-Hermen Dannenberg	Friday	Mar 9	11.00 hrs	Auditorium
Peter Lansdorp	Groningen	Studies of genomic (re-) arrangements in single cells by analysis of DNA template strands	Jacqueline Jacobs	Friday	Mar 16	11.00 hrs	Auditorium
Paul Nurse	London	Controlling the cell cycle	Rob Wolthuis	Friday	Mar 23	11.00 hrs	Auditorium
Andreas Trumpp	Heidelberg	Dormant blood stem cells and circulating cancer stem cells	Piet Borst	Friday	Apr 13	11.00 hrs	Auditorium
Lars Zender	Braunschweig	Oncogenomics-based approaches to unravel liver cancer	Daniel Peeper	Tuesday	Apr 24	11.00 hrs	Auditorium
Mike Hemann	Cambridge (USA)	Using mouse models to improve cancer therapy	Daniel Peeper	Friday	Apr 27	11.00 hrs	Auditorium
Antoine van Oijen	Groningen	Under the hood: Single-molecule studies of DNA replication	Peter Peters	Friday	May 4	11.00 hrs	Auditorium
Giorgio Scita	Milan	Membrane and actin dynamics in the plasticity of tumor cell migration	Metello Innocenti	Friday	May 11	11.00 hrs	Auditorium
Stefano Piccolo	Padua	On the molecular nature of breast cancer stem cells	Reuven Agami	Friday	May 25	11.00 hrs	Auditorium
Doug Hanahan	Lausanne	Multi-factoral determinants of malignant progression	PhD students	Thursday	Jun 6	16.00 hrs	Auditorium
Johannes Zuber	Vienna	Finding and probing cancer drug targets using advanced in-vivo RNAi	Thijn Brummelkamp	Friday	Jun 22	11.00 hrs	Auditorium
Richard Gardner	Seattle	How disorder prevents disaster in nuclear protein homeostasis	Fred van Leeuwen	Friday	July 6	11.00 hrs	Auditorium

Please check our website for changes or cancellations: www.nki.nl/Research/Seminars/Scientific+seminars

Organised by the Seminar Committee, NKI-AVL:

Reuven Agami, Christian Blank, Fred van Leeuwen,
Jelle Wesseling, Rob Wolthuis and Suzanne Corsetto.

Proposals for future seminar speakers are welcome at
s.corsetto@nki.nl. Funding for travel and accommodation
is available.
